Introduction and Purpose

This guide was developed primarily to assist news media personnel with identifying authoritative sources for news and feature articles. The resource topic listings are helpful for determining which faculty members can provide information for local and regional news stories, as well as perspectives on national and international developments.

The guide consists of two sections:

- **Faculty Resource Topics**
- **Directory of Full-time Faculty and Selected Administrative Staff**, which lists titles, e-mails and office telephone numbers

Resource topics are grouped by academic department, and alphabetized within the department by subject. Each faculty member=s telephone number and e-mail address is included.
