# Faculty Resource Guide, 2007-08

15<sup>th</sup> Edition

Produced by:

## Introduction and Purpose

This guide was developed primarily to assist news media personnel with identifying authoritative sources for news and feature articles. The resource topic listings are helpful for determining which faculty members can provide information for local and regional news stories, as well as perspectives on national and international developments.

Resource topics are grouped by academic department, then alphabetized by subject within the department. Each faculty member's telephone number and e-mail address is included.

A companion document that may be helpful is the Directory of Full-time Faculty and Selected Administrative Staff, which lists titles, e-mails and office telephone numbers.

Office of University Communications
